

Inspection and service of storage tanks

Thanks to strong partnerships in material sourcing and modern software tools for the design of tanks and vessels, we have developed know-how and technology over many years for the construction, inspection and maintenance of tanks of all types and material properties.

As an SVTI-certified company, we build small tanks (450l to 2000l) and medium-sized tanks (2000l to 60000l) with or without safety containment trays.

Features

- Visual inspection of the lid, shell and bottom
- Visual inspection of the nozzles
- Visual control of the level measurement indicators
- Checking of the safety-relevant level measuring systems, as the overflow protection or the leakage monitoring in containment trays.

Your advantages

- Low costs
- Issue of a inspection report
- Minimizing of damage through early detection
- Ensuring insurance coverage
